Mini Project

Blog site for career guidance

- This project is aimed at developing a platform which helps jobseekers to know the information about job vacancies and scope of jobs in current market and valuable courses.
- Worked together with an astounding team of 4 members where each of them owned a separate functional domain, where my module was designing the web page.
- Developed user intuitive experience using HTML5 and CSS3.

Project-1

Leukemia Diagnosis Using Machine Learning

- Leukemia is a type of cancer that affects the WBC from the bone marrow. Our project deals with the detection and classification of leukemia using microscopic blood smear images.
- We analyze large datasets of patient information using including clinical symptoms, blood test results, etc., to predict the patterns and livelihood of a patient having Leukemia.

Declaration

I hereby declare that the information furnished above is true to the best of my knowledge.
